CCD Assessment Day 2017 | Friday, February 17th 9:30 a.m. - 1:00 p.m.

Confluence Assembly Halls & Classrooms

- Opening session: 9:30 - 11:00 a.m.

- Workshops: 11:00 a.m. - 1:00 p.m.

This important professional development day begins with an overview of where we are with assessment at CCD. This year we are focusing on HLC and Numeric Thinking. We will showcase some great projects being done at CCD to assess student learning and student services.

Following the opening session, we will break into workshops where you will learn and discuss ways to improve assessment practices in your department or program. Each workshop will run twice so that you can attend the two you find the most helpful to your assessment work at CCD. Workshops are co-hosted by faculty and staff.

WORKSHOPS INCLUDE

Topic A: Assessment is part of Student Retention, Persistence and Completion.

- How these are interconnected and how you can apply for a mini-grant!

Topic B: Writing the Report

- So you have to complete an Assessment or CAS report.

- What kind of information should you include?

- What are the reviewers looking for?

Topic C: What's after the Report (Closing the Loop)?

- When you have completed an Assessment or CAS Report, what comes next?

- Is that the end of your assessment work? (Hint: No!)

- What do you do in between reporting cycles?

Topic D: Which Institutional Outcome am I assessing?

- Not sure which Institutional Outcome you are addressing in your assessment (if any of them)?

- Learn more about the I.O.'s and how they fit in with your current assessment work. Or, ask how to better address a specific I.O.
