(12:30pm) AHEC Presentation/questions

[FAQ's.docx](#) (refer to the Tivoli FAQs document and the Tivoli FCC;

[Tivoli_Facility Program Plan_DRAFT v2026-02-14.pdf](#))

1864 tivoli building was founded

1774 was labeled as a historic building

1981 students developed student union, student fee funded

Placed in state funding capital construction submittal, prioritized the tivoli reimagined for efforts are focused when the future funds become available.

Purpose: operations management, also infrastructure improvements, HVAC systems, underground electrical vault, leaks, ventilation, grease and sanitation systems need updates. 1st floor; students connect with each other, 2nd floor; students connect with community, 3rd floor; students connect with their institutions.

Prioritization approach: Looking to prioritize and rank the issues that students are focusing on for the next phase and how to proceed. NO STUDENT FEE INCREASE. Student fee is the same for the (\$30M maintained) and the (\$85M+ program plan proposed budget) New set of engagement surveys will shine light on the priorities for the students on the project. State funds are not guaranteed.

Questions Raised by SGA members

1) SGA states that the current proposed budget for the project is not accurate for the proposed plan and that the real student financial impact is not clearly outlined/defined. In the FPP, an estimated construction cost was not provided. Since these two factors are dependent factors, how much will the Tivoli cost and will the students have to pay more in future fees for this project?

No new fees and increases!

2) SGA states that the discovery phase is lacking student responses from CCD alumni and staff proving inadequate representation in the planning process. What were the responses from the schools, and will we be allowed to have time for tabling and events hosting to contribute to the extensive engagement plan?

More events for surveying, can contact AHEC to get aid on the events and responses. Evelyn suggested town hall meetings to connect and bridge the connection with students and leadership/AHEC/SGA

3) SGA states that a major contributing factor to a student's experience is parking and existing food pantry options, which are limited to one location (during operating hours 10am-5pm) and these areas need focus and development. Is it possible to expand these plans or even facilitate/remedy parking/food availability/accessibility?

Reimagined, food banks focus,

Contact to parking team, participate in town hall meetings.

4) Does the Tivoli need to be renovated?

Question 4 part 2 (in case renovation is needed). Tivoli and Larimer historical agreement that Tivoli building is a historical building, What updates/renovations are being done to the physical Tivoli building, we want to know the details regarding the historical recognition and any preservation contracts? ANSWERED.

(12:12pm) Set time for Mehdiye's presentation

Notes:

Computer Science degree, Human development technologies and wish to attend a conference in November (2-5), 2026, in Detroit, MI. I was a speaker for student leadership and scholarship advocacy at a national conference. I write and publish a research paper covering research, human-computer interaction, interface systems, and other new methods of research for students and professionals. Leading to present in 2027, Atlanta, GA, I am an emerging researcher who is networking to find other connections and bring other collaborators to the research project. Conference will help develop research studies and how to execute them.

Focus: Technology, Research and AI developments, stroke therapies and applications of technology. AI tech and research can be applied in many different industries and applications professionally, medically, etc so the students can have an upper hand in the competitive market once graduate. Trying to bridge the connection between students and the influence of technology/AI in the professional world.

Budget: Max \$1500, covering registration (800), flight, hotel to cover this trip and develop studies and connections.

Goals: Take (for example) an hour for a research/information conference about these developments in research, helping them networking, outreach, inquiring on scholarship and professional opportunities. Showing students, how personal professional development and technology/AI tech development opportunities exist on campus for students' benefit.

I want to show students how to find and acquire resources to help them achieve their goals.
