

SETTING UP THE GRADEBOOK

After you log in to your course in D2L, click on the Grades link on the navigation bar.

Grades Setup Wizard

When creating a Gradebook for the first time, the Grades **Setup Wizard** will take you through several steps that are designed to help you select options that best fit your gradebook needs. **Please note:** The Grades **Setup Wizard** will not start automatically if you already have an existing Gradebook in the course. In that case, simply select the **Setup Wizard** tab.

Scroll to the bottom of the screen and choose Start.

Two Options:

Points or Weighted. A **Points** gradebook is recommended and is easier to manage if math is not your strong suit.

Step 2 of the Wizard deals with the release of final grades in D2L.

Two options:

Calculated Final Grade: This **default option** simply releases the total that D2L has calculated based on the scores that have been entered.

Adjusted Final Grade: You may select this option. It allows you to alter a student's grade by hand. This may include rounding student's score up to the next letter grade.

Step 3 of the Setup Wizard focuses on Grade Calculations.

Choose the options that best suit your needs.

Drop ungraded items: If this option is selected, grade items that have not been assigned a grade value will be ignored when final grades are calculated. This option creates a running total in your gradebook. **If a student has received a 0 for an assignment, it is important that you enter a score of 0 for that assignment.** If you don't, the student's final grade will not be accurate.

Treat ungraded items as 0: When this option is selected, grade items with no grade value will automatically be given a grade value of 0. Selecting this option makes it look as though your students are failing for at least half of the course because they have not yet completed all grade assignments.

Auto Update: When this option is selected, the **Calculated Final Grade** will recalculate automatically when any change that affects final grade calculations (i.e. modifying a user's grade, changing the 'bonus' property of a grade item, etc.) is made. If this option is **NOT** selected, the **Calculated Final Grade** must be manually re-calculated. Out-of-date final grades are indicated by a small calculator icon beside a user's final grade.

Auto Update option should be checked.

Step 4 of the Setup Wizard allows you to select a Grade Scheme for your course.

The default **Grade Scheme** is **Percentage.** If you have not yet created any grade schemes for your course, only the default grade scheme will be available to you. For now, leave the setting as is and go to the next step.

Step 4 of 7 Step 4: Choose Default Grade Scheme				
Scheme Name	Default Scheme	Preview		
Organization Schemes				
Percentage 📀	۲			
Letter Grade		Eq.		
Continue Go Back Cancel				

Step 5 of the **Setup Wizard** allows you to set how many decimal places will be displayed in the Gradebook. A setting of zero decimal places will force grades to be rounded up. **Default setting** is 2 decimal places. Decide what is best for how you grade.

Step 5 of 7 Step 5: Ma	anaging Vi	ew Displa	y Options
Decimals Displayed			
Number of deci	mal places to dis	play 2	0
Continue	Go Back	Cancel	

Step 6 of the **Wizard** allows you to set display options for your students.

Step 6 of 7 Step 6: Student View Display Options
Grade Details ✓ Points grade ✓ Grade scheme symbol ✓ Grade scheme color
Decimals Displayed * Number of decimal places to display 2
Characters Displayed * Number of characters to display for Text items 15
Final Grade Calculation
Continue Go Back Cancel

The **decimal display** can be different for students than what was set up for the instructor view.

Displaying the **Final Grade Calculation** to users allows them to view how their final grade was

calculated. They can see which grade items contributed to their final grade. This option is not available for a formula gradebook.

Display 2 decimal places for grade item values			
Student View Display Options			
Display points grade values			
Display grade scheme symbols			
Do not display grade scheme colors			
Display 2 decimal places for grade item values			
Display 15 characters for Text type grade item values			
Display the final grade calculation to users			
Finish Go Back Cancel			

Next Steps Creating Categories and Items

Categories are great for organizing a gradebook because you can organize and group related grade items into sections. For example, you could have separate categories for Assignments, Quizzes, Case Studies, Participation, Discussions, etc. When grade items are grouped together in a category, you can distribute points equally across all grade items and drop the highest or lowest item in the group.

Categories are not necessary for keeping track of graded assignments and tasks, but **grade items are**. Categories organize your grade items only, but **Items** are where grading occurs.

The easiest way to set up categories and items is from Manage Grades.
