

Job shadow participant or student name: _____

**Community College of Denver Radiologic Technology Program
Job Shadow Completion Form**

It is widely recognized that students wishing to pursue a career in Radiologic Technology profit from job shadow experience prior to applying for or entering an accredited program. A goal of at least 12 hours of job shadow experience is strongly recommended, however CCD asks our applicants to submit proof of at least 6 hours of job shadow experience in a qualified Radiology Department as a **requirement** to apply for our program. **Please use a different form for each day/shift of job shadowing.**

The primary objectives in job shadow experience are for the student to:

- Gain an inside view at the profession of medical imaging.
- Meet currently employed registered Radiologic Technologists.
- Be familiarized with the imaging department and its equipment.
- Expand their knowledge of advanced imaging modalities (when possible).

Students should present themselves in a professional manner. This includes appropriate business attire – *first impressions are lasting impressions.*

Note: Job shadow students are not covered by CCD or the healthcare facility if any injury and/or exposure to contagion or pathogen occurs.

To be completed by a technologist in the department hosting the job shadow experience:

Facility name: _____

Date of job shadow: _____ Number of hours: _____

Please indicate the areas of experience for this job shadow experience – note that it is not expected that every student will be able to observe all of the following:

Diagnostic Radiology:	RT Signature:	Advanced Modalities:	RT Signature:
